14. (currently amended) A data cable having a plurality of twisted pair conductors, a cable covering, and an interior support comprising:
said interior support being unshielded and having:
a longitudinally extending central portion forming a portion of said support; a plurality of projections extending from said central portion; each projection of said plurality of projections being adjacent to two other projections of said plurality of projections, said plurality of projections forming a plurality of adjacent projections;
an open space defined by each of said plurality of adjacent projections;
said cable covering contacting each projection;
only one twisted pair conductor from said plurality of twisted pair

conductors disposed in each open area space; and wherein said cable covering includes an overall shield.

15. (Canceled)
16. (Previously presented) The cable of claim 14 wherein each of said projections is a projection selected from a group consisting of a prong, a spline, and an arm.
17. (Previously presented) The cable of claim 14 wherein said open area space is an open area space selected from a group consisting of a channel, a groove, a duct, and a passage.
